What is claimed is:

1.   A method comprising:

       receiving a plurality of streaming content description data about a plurality of
streaming content;

       receiving a plurality of stored content description data about a plurality of
stored content;

       providing a program guide including at least some of the streaming content
description data and at least some of the stored content description data.

2.   The method of claim 1 further comprising:

       receiving a request to present a selected stored content; and

       presenting the selected stored content.

3.   The method of claim 1 further comprising:

       receiving a request to provide a plurality of details about a selected stored
content; and

       presenting the details about the selected stored content.

4.   The method of claim 1 further comprising:

       receiving a request to present a selected streaming content; and

       presenting the selected streaming content.

5.   The method of claim 1 further comprising:

       receiving a request to provide a plurality of details about a selected streaming
content; and

       presenting the details about the selected streaming content.

1   6.   The method of claim 2 wherein presenting comprises:

2   decrypting the stored content.

1   7.   The method of claim 2 wherein presenting comprises:

2   decompressing the stored content.

1   8.   The method of claim 4 wherein presenting comprises:

2   decrypting the streaming content.

1   9.   The method of claim 4 wherein presenting comprises:

2   decompressing the streaming content.

1   10.   The method of claim 1 further comprising:

2   receiving a content manager update.

1   11.   The method of claim 1 further comprising:

2   receiving a new content manager.

1   12.   A system comprising:

2   a coordinator to receive a plurality of streaming content description data about

3   a plurality of streaming content;

4   at least one content manager to provide to the coordinator a plurality of stored

5   content description data about a plurality of stored content.

1   13.   The system of claim 12 wherein the coordinator provides a program guide

2   based on the streaming content description data and the stored content description

3   data.

1   14.   The system of claim 12 wherein the coordinator invokes the content manager

2   to present a user selected content.

15.   The system of claim 14 wherein the user selected content is one of the
plurality of streaming content or one of the plurality of stored content.

16.   The system of claim 12 wherein the coordinator comprises:

    a presentation component;

    a decryption component; and

    a decompression component.

17.   The system of claim 12 wherein each content manager comprises:

    a presentation component;

    a decryption component; and

    a decompression component.

18.   The system of claim 12 wherein the coordinator receives a new content
manager.

19.   The system of claim 12 wherein the coordinator receives a content manager
update.

20.   A computing device comprising a machine readable medium and a processor,
the machine readable medium including instructions which when executed by the
processor cause the processor to perform operations comprising:

    receiving a plurality of streaming content description data about a plurality of
streaming content;

    receiving a plurality of stored content description data about a plurality of
stored content;

    providing a program guide including at least some of the streaming content
description data and at least some of the stored content description data.

21.   The computing device of claim 20 wherein the instructions cause the processor to perform further operations comprising:

receiving a request to present a selected stored content; and

presenting the selected stored content.

22.   The computing device of claim 20 wherein the instructions cause the processor to perform further operations comprising:

receiving a request to provide a plurality of details about a selected stored content; and

presenting the details about the selected stored content.

23.   The computing device of claim 20 wherein the instructions cause the processor to perform further operations comprising:

receiving a request to present a selected streaming content; and

presenting the selected streaming content.

24.   The computing device of claim 20 wherein the instructions cause the processor to perform further operations comprising:

receiving a request to provide a plurality of details about a selected streaming content; and

presenting the details about the selected streaming content.
